Summary

Senior Unity/C# Developer with 8 years of experience, including 7 years building and operating a commercial mobile game serving 1M+ registered players and 300K MAU. Experienced in gameplay systems, client architecture, LiveOps, backend integration and Android/iOS production environments.

Experience

Senior Unity Developer Jan 2026 – Current
Indipendent @ Oneiros Games *Milan, Italy*

Development of **Check-Mate**, a mature PC chess game in Unity with visual novel elements. Responsible for project structure, UI systems, UI animations, visual effects and services integration.

- Designed the core architecture around modular, interchangeable services to improve maintainability and extensibility.
- Built a robust navigation system that allows for fast integration of new pages and popup with native async context loading.
- Integrated Naninovel seamlessly in the existing architecture.

Senior Unity Developer Sep 2022 – Sep 2025
WhatWapp Entertainment *Milan, Italy*

Led client-side development of **Burraco: La Sfida**, the **6th Top-Grossing Card** game in Google Play Store, optimizing the codebase and driving the implementation of new gameplay features using uGUI, sprites, animators and tween libraries, particle effects and custom shaders.

- Worked closely with UI and UX designers to build the interactive front-end of the game for 1M+ players to enjoy.
- Handled weekly Live-Ops and content updates through Addressables and Asset Bundles for 300K MAU, prepared AB-tests and configured offers using internal tools and editing remote configs.
- Defined and integrated a scalable framework to remotly create popup offers with dynamic content, customization and functionality allowing for rapid deployment and testing of offers without requiring a full build release.
- Optimized the app loading system to be modular, efficient and robust, reducing load times by 50.
- Created a stable app rating system that brought the rating from 3.2 to 4.4 in 3 months from 12+ months of stagnation.
- Played a key role in migrating the server architecture from GameSparks to Nakama without downtime.
- Oversaw Android and iOS releases, and implemented automation scripts reducing deployment time.
- Handled updates of the underlying SDKs such as Facebook, Firebase, Crashlytics, Unity Ads, Ironsource and mediation platforms, Smartlook and Appsflyer ensuring compatibility and stability.

Unity Developer Aug 2018 – Sep 2022
WhatWapp Entertainment *Milan, Italy*

Contributed to both front-end and back-end development for **Burraco: La Sfida**, the **first ranked** Burraco card game in Italy.

- Development of client code and graphics implementation in Unity 3D.
- Development of server architecture in GameSparks using JavaScript.
- Designed a configurable server-side matchmaking system.
- Improved the localization system of the game, allowing for smart dynamic updates without requiring a full build release.

Localization Tester Jun 2017 – Feb 2018
Testronic *London, UK*

- Testing and bug reporting for the Italian language in console and mobile games.
- Translation and proofreading.

Technical Skills

Game Engines	:	Unity, Unreal Engine
Languages	:	C#, JavaScript, TypeScript, JSON, HLSL
Patterns	:	OOP, MVC, Services, ScriptableObjects, Reactive Programming (UniRx), Async (UniTask), Addressables
Graphics & Tools	:	Blender, Photoshop, Substance Painter, Substance Designer, Shader Graph
DevOps	:	Nakama, Git, Bitbucket, Unity Cloud Build, Unity Gaming Services, Firebase, Crashlytics
Workflow	:	Asana, Notion, Miro, Kibana, Grafana, Slack, AI Tools (Copilot, Codex)

Projects

RC Madness *(In Development)* Unreal Engine

- Solo-development of PC racing game focused on RC car physics and user-generated tracks.
- Responsible for gameplay systems, graphics, UI, and performance optimization.

Education

Brunel University London London, UK
Bachelor of Arts in Games Design, Film and TV *2014 – 2017*

- Last Day On Earth. Development of an exploration video game made in UE4.
- The Kitty's Revenge. Two minute animated short rendered in UE4.

ITC Luigi Einaudi Correggio, Italy
Perito Industriale Capotecnico *2009 – 2014*

- Certificate in ECDL CAD 2D
