SENIOR UNITY DEVELOPER

Senior Unity Game Developer with **8 years of experience** specialized in building and maintaining **live-service mobile games**. Strong background in client-side architecture, **Live-Ops** and full-stack integration, with a focus on performant, visually polished experiences.

TECHNICAL SKILLS

Game Engines : Unity, Unreal Engine
Languages : C#, JavaScript, TypeScript, JSON
Graphics & Tools : Blender, Photoshop, Substance Painter, Substance Designer
DevOps : Nakama, Git, Bitbucket, AI (Copilot), Unity Cloud Build
Workflow : Asana, Notion, Miro, Kibana, Grafana

EXPERIENCE

Senior Unity Developer
WhatWapp Entertainment

2022 – Sep 2025
Milan, Italy

Led client-side development of **Burraco: La Sfida**, the **6th Top-Grossing Card** game in Google Play Store, optimizing the codebase and driving the implementation of new gameplay features using uGUI, sprites, animators and tween libraries, particle effects and custom shaders.

- Worked closely with UI and UX designers to build the interactive front-end of the game for **1M+ players** to enjoy.
- Handled weekly Live-Ops and content updates through Addressables and Asset Bundles for **135K MAU**, as well as prepared AB-tests and configured offers using internal tools and editing remote configs.
- Refactored the app loading system to be modular, efficient and robust, **reducing load times by 50%**.
- Created a stable app rating system that brought the **rating from 3.2 to 4.4** in 3 months from 12+ months of stagnation.
- Played a key role in migrating the server architecture from GameSparks to Nakama **without downtime**.
- Oversaw Android and iOS releases, and implemented automation scripts **reducing deployment time**.
- Handled **updates of the underlying SDKs** such as Facebook, Firebase, Crashlytics, Unity Ads, Ironsource and mediation platforms, Smartlook and Appsflyer ensuring compatibility and stability.

Unity Developer
WhatWapp Entertainment

2018 – 2022
Milan, Italy

Contributed to both front-end and back-end development for **Burraco: La Sfida**, the **first ranked** Burraco card game in Italy.

- Development of client code and graphics implementation in Unity 3D.
- Development of server architecture in GameSparks using JavaScript.
- Designed a configurable **server-side matchmaking system**.
- Improved the localization system of the game, allowing for **smart dynamic updates** without requiring a full build release.

Localization Tester
Testronic

2017 – 2018
London, UK

- Testing and bug reporting for the Italian language in console and mobile games.
- Translation and proofreading.

PROJECTS

Check-Mate (In Development)

Unity

- Co-developing a mature chess PC game in Unity.
- Responsible for UI systems, UI animations, visual effects, and sound design.
- Alpha build available to early supporters via Patreon.

RC Madness (In Development)

Unreal Engine

- Solo-development of PC racing game focused on RC car physics and user-generated tracks.
- Responsible for gameplay systems, graphics, UI, and performance optimization.

Roll Rush

Unity

- An endless runner game for Android where you control a toilet roll navigating through obstacles and collecting paper to survive.

Bocce Galore

Unity

- My first Android game inspired by Italian Bocce. Features physics-based gameplay with simple tap-and-drag controls and an experimental accelerometer mechanic.

EDUCATION

Brunel University London

Bachelor of Arts in Games Design, Film and TV

London, UK

2014 – 2017

- Last Day On Earth. Development of an exploration video game made in UE4.
- The Kitty's Revenge. Two minute animated short rendered in UE4.

ITC Luigi Einaudi

Perito Industriale Capotecnico

Correggio, Italy

2009 – 2014

- Certificate in ECDL CAD 2D
